

Fisioterapia para Niños

Now in Madrid: **Paediatric Physiotherapy**

Languages: English, Dutch, German and Spanish

For new-born **BABIES** and **CHILDREN** up to 18 years old.

- Do you think your child's development is 'delayed' ?
- Your baby may be very irritable , restless and has an irregular sleeping pattern?
- Your child tends to fall over his feet while running?
- You can't read your child's hand-writings?
- Is it difficult for your child to catch and throw balls?

For all the above mentioned problems and much more, **PAEDIATRIC PHYSIOTHERAPY** can help your child to perform at his/her appropriate level.

LEARNING THROUGH PLAY is the keyword to achieve the best results.

AT FIRST a developmental assessment will be done to inventorise your child's needs

FOLLOWED by an advice about immediate, and long term requirements and a plan for appropriate treatment. Treatment can include exercises, posture education, massage, stretching, Cranio-sacral Therapy,and much more.
